Full-Stack Web Developer · BS Applied AI & Data Science, IIT Jodhpur

SUMMARY

Full-stack web developer who ships working software to production, not tutorials to a hard drive. Built and deployed three backend products — a civic issue platform, a student notes-sharing API, and a URL shortener — with JWT authentication, role-based access, analytics, and live public URLs. Strongest in Python/FastAPI backends and React front-ends; comfortable across the full web stack.

TECHNICAL SKILLS

Front-end:	HTML5, CSS3, Bootstrap 5, JavaScript (ES6), React
Back-end:	Python, FastAPI, REST API design, JWT authentication, SQLAlchemy
Databases:	SQLite, PostgreSQL, SQL fundamentals
Tools:	Git, GitHub, Render deployment, VS Code

PROJECTS

CivicFix — Civic Issue Reporting Platform live · repo

- Full platform for reporting civic issues with photo + location reports, admin→worker assignment, and live status timeline.
- Explainable 0–100 risk ranking for prioritization; JWT role system spanning user / admin / worker.
- Integrated Gemini for category assistance and CLIP-based fake-photo detection.
- Deployed on Render with a public live URL.

StudentVault — Student Notes Sharing API live API docs · repo

- REST API for sharing and discovering study notes: JWT auth, resource-ownership checks, full-text search, community upvotes.
- Built with FastAPI + SQLAlchemy; interactive OpenAPI docs served live.

LinkBolt API — URL Shortener with Analytics live API docs · repo

- URL shortening service with per-link ownership and per-link click analytics.
- FastAPI + SQLite; JWT-secured link management.

Personal Portfolio Site live · repo

- Responsive portfolio built in pure HTML/CSS/JS — animated UI, live GitHub stats, no frameworks.

EDUCATION

BS in Applied AI & Data Science — IIT Jodhpur

Ongoing · Expected 2030

Coursework: machine learning foundations, linear algebra, statistics, deep learning.
